

SentitO, Stealth and tel(x) Partner To Bring Voice Peering To TDM-based Service Providers ***First Result from Partnership Includes Free VoIP Trial***

New York, NY (June 14, 2006) – sentitO Networks, Stealth Communications, and tel^x, today announced at the 2006 Customer Business Exchange event organized by tel^x, a partnership to accelerate the exchange of VoIP with traditional TDM based service providers. Under the partnership, sentitO, Stealth and tel^x will make available free connections to Stealth's Voice Peering Fabric (VPF) with sentitO's IVG1200 Intelligent Voice Gateway, hosted at the tel^x New York interconnection facility, located at 60 Hudson. The sentitO gateway will translate TDM to VoIP telephone calls between traditional service providers and VPF Members.

"This trial service allows service providers to start generating profitable VoIP revenues with less required capital while simplifying their network architecture," commented Shaun Donnelly, Vice President of Sales and Marketing, sentitO Networks, "Service Providers now can easily interface into the VPF".

Service providers that take advantage of this free offer will benefit with increased profit margins, Simplified carrier and enterprise interconnection, reduced time-to-revenue by standardizing interoperability, seamless migration from trial to network implementation, and rapid deployment of VoIP services.

sentitO's Open Network Xchange (ONX) architecture and solution set provide media and signaling conversion between the PSTN and IP networks, while facilitating new service delivery in a multi-vendor environment. The ONX product portfolio includes the IVG1200 Intelligent Voice Gateway, Proxy7 Signaling Gateway, and PreVision Network Manager.

"This arrangement is a unique solution. We look forward to help ease the complexity of VoIP migration for many organizations with traditional infrastructure." stated Shrihari Pandit, Founder & CEO of Stealth Communications, Inc.

Located in 9 U.S. cities and London, the Voice Peering Fabric has become the preferred platform and marketplace for Service Providers, Enterprises, and Government Agencies to exchange VoIP traffic and telephony related services. VPF functions as an exchange or meet-point and is designed as a private voice Internet allowing members to establish peer-to-peer connections in a secure, quality-of-service environment.

SentitO and tel^x are also key sponsors of Stealth Communications' Voice Peering Forum Summer 2006, being held on June 29, 2006 at Chelsea Piers, New York City. The Voice Peering Forum will host experts from leading global companies who will discuss the latest innovations, implementations and business trends in Voice Peering. For more information on the forum, visit: www.thevpf.com/nyc06.

To take advantage of this free offer, please contact sentitO Networks at (212) 308-1417 or (978) 206-0900, or visit www.sentitO.com, www.stealth.net, or www.telx.com.
