

The Voice Peering Forum Winter 2006 Announcement

New York, NY, October 17, 2006 – Stealth Communications, Inc., owner and operator of the Voice Peering Fabric (VPF) is pleased to announce the Voice Peering Forum Winter 2006, with our local host CRG West, the operator of the One Wilshire building. The forum will be held on Monday December 11, 2006 at the Wilshire Grand Hotel in downtown Los Angeles, CA, USA.

Since the launch of the Voice Peering Fabric (VPF) in 2003, the unique model of the VPF has changed the landscape of the telecommunications industry by moving telephone calls into the IP domain bypassing both the public telephone system and the public Internet. With the security and quality attributes of the VPF, enterprises, government agencies and service providers have made the VPF their preferred platform for buying, selling & exchanging telephony related services. With an annual run-rate already surpassing 100 billion minutes in 2006, VPF brings back the fundamentals of doing business in a simple and trusted environment.

Continuing the focus to educate, the Voice Peering Forum Winter 2006 is extending its programming and our community to the west coast for the first time. A team of industry experts and business level-executives are prepared to share their insights on the latest business and technology innovations, while keeping our community up-to-date on current issues and trends that relate to voice peering. We welcome your participation to our forum to meet and network with representatives of voice applications, equipment and services.

The Voice Peering Forum Winter 2006 will feature topics on:

- Business drivers, implementations and case studies on voice peering
- Bi-lateral peering (least-cost-routing) and multi-lateral peering (ENUM/SRV)
- Transitioning to IP based trunking for voice origination and voice termination services
- Strategies, designs and best practices for VoIP security, QoS and CALEA enablement
- Transitioning SS7 interconnections to IP via SIGTRAN and SIP protocols
